CSCD01, Team “CSCD01 Best Group” Team Agreement

Methods of Communication

- The primary channel for communication will be Slack, as it is convenient for all members.
- The secondary channel for communication will be Trello, which will be used primarily to track sprint progress.
- Slack messages will be answered within two hours not including the hours of 12 AM to 6 PM.

Meeting Set-up

- There will be a weekly mandatory physical team meeting on Monday starting at 5 PM with a minimum length of one hour to a maximum length of two hours. This meeting will take place at IC220 if there is sufficient space or at an agreed upon location once all members have assembled.
- Informal meetings may be held between any number of members over any medium without all members present.
- One member will take individual minutes per meeting. The member in charge of minutes will be rotated throughout the duration of the project and will be decided in the previous meeting. The same applies to the role of scrum master.
- The meeting will cover a retrospective of work done in the previous sprint as well as plan for the next sprint.
- There will be a daily stand-up on Slack taking place before 11 AM.

Codebase Set-up

- There will be no committing of extraneous files to the GitHub repository.
- There will be one test branch from master which will be the common branch for all members to make changes to. Additional branches can be created by members when they work on new features. There will be no merging of the master and test branches unless all members agree.
- Commit messages must be concise and helpful; list all changes that are deemed relevant.
- The master branch will be what is submitted for deliverables. Before submission all members must verify for correctness.
- Ensure proper documentation of all submitted code, this includes docstrings and embedded comments.
- Each newly created feature must be accompanied by a test suite.
- All code must be PEP8 compliant to ensure a high level of consistency.

Teamwork Set-up

- Team members must be open about his/her ability to complete work.
- If a member falls behind, ensure the team is notified and provide proper justification.
- Disagreements between team members about the product will be put to a team vote.
- Personal disagreements between team members will be mediated by the scrum master and escalated to a teaching assistant if it still can not be resolved.

We accept these guidelines and intend to fulfill them (sign below):
